

JITENDRA RAWAT

Software Developer

Dallas, TX | jitendra.rawat15@yahoo.com | [+1 682-390-5525](tel:+1682-390-5525) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Software Developer with 5 years of experience in backend engineering, API development, and cloud. Strong in Java, Spring Boot, and microservices, and currently working with Python, FastAPI, LangGraph, and AI agent workflows. Recent work includes building MCP servers (Azure MCP and SharePoint MCP) and supporting infrastructure on Azure. Experienced in secure REST APIs with Spring Security and JWT, database tuning across SQL and NoSQL, and CI/CD with GitHub Actions and Azure DevOps pipelines.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript

Frameworks: Spring Boot, Spring Cloud, Spring Security, JPA / Hibernate, FastAPI, React.js

AI & Agents: LangGraph, LangGraph Studio, AI agent workflows, MCP servers (Azure MCP, SharePoint MCP), GitHub Copilot

Cloud: Azure (App Registration, Key Vault, Blob Storage, Graph API, Container Registry), AWS (EC2, API Gateway, Route 53)

Databases: PostgreSQL, MySQL, Couchbase (N1QL), MongoDB, Cassandra

DevOps & Tools: Docker, Kubernetes, GitHub Actions, Azure DevOps Pipelines, CI/CD, Git, SonarQube, Jira

Other: REST APIs, GraphQL, Microservices, Kafka, ELK Stack / Kibana, JUnit, Mockito, Agile / SDLC

PROFESSIONAL EXPERIENCE

Technology Analyst — Infosys, Dallas, TX

Jul 2025 – Present

Client: AT&T

Mar 2026 – Present

- Built Azure MCP and SharePoint MCP servers to connect internal tools with company data and systems.
- Developed multiple AI agent workflows with LangGraph and LangGraph Studio, automating manual tasks for internal teams.
- Worked with Azure app registration, Key Vault, Blob Storage, Microsoft Graph API, and Container Registry.
- Supported infrastructure work, including application deployments and pod health checks.
- Resolved user queries and production issues, finding the root cause and fixing them quickly.

Client: Verizon (Verizon Business Group)

Jul 2025 – Mar 2026

- Migrated APIs from IBM Vision to on-premises Spring Boot microservices with minimal downtime.
- Migrated APIs to the new NSA architecture and added new business logic based on client needs.
- Led the offshore development team on production support, defect fixes, and new feature development.
- Diagnosed API failures and analyzed logs in Kibana to resolve high-priority production defects.
- Built and enhanced Spring Boot microservices based on client requirements to improve performance.
- Reviewed code in Git with SonarQube and used GitHub Copilot to speed up development.

Senior Software Engineer — Shoptaki, New York, NY

Mar 2025 – Jul 2025

- Built a user management microservice and secure REST APIs in Java and Spring Boot.
- Developed responsive React.js interfaces with reusable components for consistent behavior.
- Built multiple React components for payment systems from Figma designs.

Associate Software Engineer — Prodapt, Bangalore, India

Apr 2021 – Dec 2022

Clients: T-Mobile (DT Croatia), Apr 2021 – Dec 2021 · British Telecom (BT Group), Jan 2022 – Dec 2022

- Engineered Spring Boot microservices handling 100K+ transactions a day, using PostgreSQL, Kafka, and Spring Security.
- Worked on Space Inventory Management (SIM) in BT's SRIMS platform, replacing the licensed Advitium tool.
- Designed Couchbase schemas and wrote N1QL queries with indexing and bucket-level caching for fast retrieval.
- Cut PostgreSQL query time from 2.5 seconds to 800 milliseconds by improving data models and indexing.
- Added role-based access control and connected the service to BT's single sign-on system.
- Set up centralized logging with the ELK stack and wrote JUnit tests with Mockito for high coverage.
- Used RestTemplate and WebClient for synchronous and asynchronous calls between services.
- Ran a proof of concept on Camunda to explore workflow automation for inventory processes.
- Led daily Agile stand-ups in Jira, closing 200+ production defects and improving resolution speed by 35%.

Jr. Java Developer — Thinkquotient Software Pvt Ltd, Pune, India

Jan 2021 – Apr 2021

- Developed REST APIs in Java and Spring Boot with JPA/Hibernate for efficient data persistence.
- Optimized CRUD operations using ORM techniques and custom queries for better database performance.
- Improved PostgreSQL retrieval speed by restructuring tables and adding indexes.
- Reviewed code in Git, finding and fixing critical security issues.

Web Developer — WEBCODER, Dehradun, India

Jan 2020 – Dec 2020

- Built backend components in Java and connected them to the frontend through REST APIs.
- Created a responsive frontend with React, HTML, CSS, and JavaScript, adding authentication and data validation.

EDUCATION

Master of Science in Computer Science

Dec 2024

Pace University, Seidenberg School of Computer Science and Information Systems — New York, NY

GPA: 3.91 / 4.00
